Technology At Your Speed Of Business

Voice PRI

Voice PRI delivers voice communications on a 100% digital connection to the customer's PBX. Inbound and outbound calling are combined on the same connection which maximizes efficiency and enables scalable growth. Cavalier makes this leading edge technology affordable for small and medium sized businesses.

Features and Functionality:

- Digital T1 providing local and long distance over a T1 connection to the customer's PBX
- Primary Rate Interface - 23 Bearer Channels plus 1 Data Channel (23B + D)
- DID Capability. Allows incoming calls to reach a specific number served by a PBX without the use of a call attendant
- Call by Call Allocation. Enables all 23B channels to be used for inbound and outbound call types at any time
- Dedicated Trunk Groups. Bearer channels can be configured as stand along trunk groups. Trunk groups are dedicated to a specific type of voice service such as inbound or outbound
- Caller ID with Name included
- Local Calls. Per local call or unlimited pricing available
- Enhanced 911. Allows the station user's DID number to be transmitted over the D channel which enables the caller's DID number to appear on the recipient's phone display

Benefits:

- **Reliable.** Voice PRI is backed by Cavalier's stringent service level agreement covering network availability. Our commitment to customer satisfaction has helped us achieve an industry leading T1 retention rate greater than 99%
- **Flexible.** Voice PRI enables your business to handle more calls on a single digital connection. Voice PRI can adapt as your needs change
- **Efficient.** Technology enables an efficient way to consolidate traffic from a PBX, reducing equipment costs
- **Affordable.** Cavalier's competitive pricing makes this powerful technology affordable
