Product	Description	Application
<b>BusinessTalk Basic</b>	Local telephone service that includes a block of local calls plus Three Way Conference and Speed Dial. Additional features and affordable long distance calling blocks can be purchased separately.	Businesses with low to medium local calling needs that require the most economical package.
<b>BusinessTalk Value</b>	Local telephone service with unlimited local calling plus Caller ID with Name, Three Way Conference and Speed Dial. Additional features and affordable long distance calling blocks can be purchased separately.	Businesses with higher local calling needs that require an affordable local calling solution.
<b>BusinessTalk Unlimited</b>	Local telephone service with unlimited local and unlimited domestic long distance calling. Service comes packed with popular features including Caller ID with Name, Three Way Calling, Speed Dialing and others.	Businesses with higher local and long distance calling needs that require an affordable and predictable cost solution.
<b>Smart</b>	Local telephone service and High-Speed Internet on one convenient T1 connection. Service includes popular calling features, unlimited local calling, long distance and toll free minutes, email, web hosting and much more.	Businesses that want the convenience and flexibility of having a single high speed connection for all their voice and data needs. Bandwidth for internet applications automatically increases when voice lines are not in use which increases employee productivity.
<b>ISDN PRI</b>	Integrated Services Digital Network Primary Rate Interface that provides an all digital connection between the Cavalier network and the customer premise.	Businesses that want an all digital voice service and the flexibility of call by call allocation, direct inward dialing and other advanced voice features.
<b>Long Distance</b>	Long Distance 1+ outbound and toll free inbound services for in-state, inter-state and International calling.	Businesses that require affordable domestic and international voice communications and toll free inbound calling.
<b>Voice Mail</b>	Network based centralized voice messaging service that captures messages 24 hours a day, seven days a week when phone lines are busy or not answered.	Businesses that require an affordable, provider managed voice messaging solution. No equipment to purchase or repair.
<b>Audio &amp; Web Conferencing</b>	Toll Free reservation less conferencing service enables multiple users from different locations to dial into one telephone number and participate in the same telephone call, creating a virtual meeting. Web Conference option allows presentations or desktop applications to be shared with audio participants. Operator Assisted Event Calls available.	Businesses with a distributed workforce needed to regularly communicate and share information verbally or through the use of presentation materials.
